

13.2.9 Lab: Configure an iPad VPN Connection

Candidate: Richard Habib ()

Time Spent: 00:07

Score: 0%

Task Summary

Required Actions

✗ Add an IPsec VPN connection [Show Details](#)

✗ Turn on VPN and connect

Explanation

Complete this lab as follows:

1. Verify your connection to the Home-Wireless network.
 - a. Select **Settings**.
 - b. Select **Wi-Fi**.
From the right, notice that you are connected to the Home-Wireless network.
2. Add and configure a VPN.
 - a. From the left menu, select **General**.
 - b. From the right menu, select **VPN**.
 - c. Select **Add VPN Configuration**.
 - d. Select **IPsec**.
 - e. Configure the IPsec options as follows:
 - Description: **CorpNetVPN**.
 - Server: **198.28.56.22**
 - Account: **mbrown**
 - Secret: **asdf1234\$**
 - f. In the upper right, select **Save**.
3. Connect to the VPN just created.
 - a. Under VPN Configuration, slide Not Connected to **ON**.
 - b. When prompted, enter **L3tM31nN0w** (0 = zero) as the password.
 - c. Select **OK**.
