

12.1.9 Lab: Configure Wireless Profiles

Candidate: Richard Habib ()**Time Spent:** 26:46**Score:** 0%**Task Summary****Required Actions**

-
- ✗ Create the wireless profile for the PoliceVan network
 - ✗ Use WPA2-Personal authentication
 - ✗ Use AES encryption
 - ✗ Use *4WatchingU* for the security key
 - ✗ Start the connection automatically if the network is detected
 - ✗ Connect even if the network is not broadcasting
 - ✗ Delete the out-of-date TrendNet-BGN wireless profile
-

Explanation

Complete this lab as follows:

1. Manually create the wireless network profile on the laptop.
 - a. Right-click **Start** and then select **Settings**.
 - b. Select **Network & Internet**.
 - c. Select **Wi-Fi**.
 - d. Select **Manage known networks**.
 - e. Select **Add Network**.
 - f. In the *Network name* field, enter **PoliceVan**.
 - g. Use the Security type drop-down menu to select **WPA2-Personal AES**.
 - h. In the *Security Key* field, enter **4WatchingU**.
 - i. Select **Connect automatically**.
 - j. Select **Connect even if the network is not broadcasting** and then click **Save**.
 2. Delete the out-of-date profile.
 - a. From **Manage known networks**, next to the *TrendNet-BGN* profile select **Forget**.
