Candidate: Richard Habib ()
Time Spent: 00:24

Score: 0%

Task Summary

Required Actions and Questions

✕ Allow Remote Desktop connections

✕ Allow Tom Plask to connect using the Remote Desktop

✕ *Q1*: Which of the three network types are configured to allow access through the firewall for remote desktop?

     Your answer: Private network, ~~Hidden network~~

     Correct answer: Domain network, Private network, Public network

Explanation

Complete this lab as follows:

1. Configure Office1 to allow connections from Remote Desktop.
    a. Right-click **Start** and select **Settings**.
    b. From the right pane, scroll down and select **Remote Desktop**.
    c. Under Remote Desktop, slide the **button** to the right.
    d. Select **Confirm**.

2. Add Tom Plask as a user who will be able to connect to Office1 using a Remote Desktop connection.
    a. Select **Remote Desktop users**.
    b. Select **Add**.
    c. Enter **Tom Plask**.
    d. Select **OK** to add the user.
    e. Select **OK** to close the dialog.

3. Verify that the firewall ports for the Remote Desktop are opened appropriately.
    a. On the left, select **Privacy and Security**.
    b. Select **Windows Security**.
    c. Select **Firewall & network protection**.
    d. Select **Allow an app through firewall**.
    e. Scroll down and verify that **Remote Desktop** is marked.
    f. From the upper right, select **Questions**.
    g. Answer the question.
